# TrapEase®

## COMPOSITE WOOD DECK SCREW

### NO MORE MUSHROOMS!

Specially designed to eliminate the "mushrooming" effect caused by standard deck screws in composite deck materials.

The design features of this FastenMaster product include:

- Oversized top thread traps most loose composite material during installation
- Concave underside of the head traps any additional loose material, pushing it back into the hole
- Guaranteed corrosive resistant coating greatly outperforms standard galvanized coating. Note: TrapEase Stainless Steel is recommended for use in salt water environments.
- Sharp piercing point cuts through the composite material in the first rotation
- Deep #2 square-drive provides the best bit engagement, reducing cam out

### NO MORE MUSHROOMS!
